In this chapter, you’ll learn:

*Why spelling matters*

*How to become a better speller*

*How to distinguish between confusing sound-alike and look-alike words*

Does spelling matter? We often hear CSRs say, it’s only e-mail, it’s not important. It takes too long to spell check each e-mail. But an e-mail with misspellings gives the customer an impression of you: you are sloppy; you are not professional. Your company does not care about its customers.

Spelling Does Matter!

What would you think if you’d received this e-mail response to a message inquiring about a product guarantee?

Our product guarantee is “Gauranteed Period.”

Not only is guaranteed misspelled, but it is misspelled two different ways! If you were the customer that received that e-mail, the sloppy spelling might make you worry about the guarantee, or whether your purchase would be shipped on time, and if your credit card would be correctly billed. Finally, you might see whether you could purchase this product somewhere else—with a more reliable “guarantee.”

Spell check programs are a great help to many poor spellers, bad typists and busy CSRs who often don’t take the time to proofread their e-mails before sending them out. Spell check programs flag many misspelled words. Some automatically correct commonly misspelled words.

But poor spellers often find that spell check is only a partial solution. The spell checker may not recognize your misspelling, so spell checker offers no correct choices. Or, it could display more than one likely candidates for the correctly spelled word. Sometimes you can find the correct spelling leafing through the dictionary. But if you truly have no idea of how to spell the word (is the first letter c or s?) you could spend a long time skimming dictionary pages looking for the correct spelling.
Compile Your Own Spelling List

One way to become a better speller is to compile your own list of words you frequently misspell. List them in this chart. Once you’ve added a word and checked the list a few times, you’ll have memorized the correct spelling. You can then cross it off your list!

**Words I Frequently Misspell**

<p>| | |</p>

Sometimes, misspelling is not the problem. You’re confused by sound-alike or look-alike words (*to, too, two*).

**Try It**

This message would get through spell check, but it has errors in word usage. Circle each incorrect word, and write the correct word above it.

Thanks for your inquiry about the pair of red shoes featured in our catalog. The shoes are dyed to match the dress that is shown on the same page. Many people order both and like to wear them together.

The shoes are on sale. If you’d like to buy this item, you must first pay the balance on your overdue account. We are not allowed to ship you new merchandise until you pay your past due bill.

This version of the e-mail has the correct word written above the word it replaces.
Did you find all of these look-alike and sound-alike words? If you missed any of these words, check the list of sound-alikes below that may appear in your customer service e-mails. This list will help you choose the correct word.

**Frequently Confused Words: Sound-Alikes and Look-Alikes**
