

Contents

1	Executive Summary	6
1.1	Project Goals and Tasks	6
1.2	A Range of City Stakeholders Informed the Project	7
1.3	Lower-Income Seattle Residents Face Broadband Affordability and Availability Challenges	8
1.4	The City Prioritized Geographic Areas for Wireless Deployment	10
1.5	Sample Design and Cost Estimate	11
1.6	Framework for Understanding Potential Partnership Opportunities	12
1.6.1	The Wireless Industry Seeks Access to Public Infrastructure	12
1.6.2	Wireless Technology Options	13
1.7	Recommendations	15
1.7.1	Short-term Strategies	15
1.7.2	Medium-term Strategies	16
1.7.3	Long-term Strategies	16
1.8	Seattle’s Privacy Policy Will Guide Future Steps	17
2	The Digital Inclusion Challenge for Lower-Income Residents of Seattle	19
3	The City Prioritized 12 Digital Equity Locations and Six Parks for Wi-Fi Service	21
3.1	Digital Equity Locations	23
3.1.1	Yesler Terrace	23
3.1.2	High Point	24
3.1.3	South Park	25
3.1.4	Rainier Vista	26
3.1.5	Othello	27
3.1.6	Rainier Beach	28
3.1.7	Lake City	29
3.1.8	SW Roxbury Street Corridor	30
3.1.9	23 rd Avenue Corridor	31
3.1.10	Judkins Park	32
3.1.11	Jimi Hendrix Park	33
3.1.12	Pratt Park	34
3.2	City Parks	35
3.2.1	Warren G. Magnuson Park	35
3.2.2	Camp Long	36
3.2.3	Discovery Park	37
3.2.4	Westlake Park	38

3.2.5	Occidental Square.....	39
3.2.6	Waterfront Park.....	40
4	High-Level Wi-Fi Network Design	41
4.1	Design Summary	41
4.2	Technical Parameters	42
4.3	Backhaul Connectivity	43
4.3.1	Digital Inclusion Areas	44
4.3.2	Park Areas.....	44
4.4	Network Scalability and Upgrades.....	44
4.5	Operations and Maintenance	45
4.6	Design Areas	45
4.6.1	Digital Inclusion Areas	45
4.6.2	Parks	46
5	The State of the Wireless Market.....	51
5.1	The Densification of Cellular Networks	51
5.2	Economic Challenges for Small Cell Deployment	52
5.3	Wi-Fi’s Integration with Cellular Networks.....	53
5.4	The Impact of Millimeter Wave Technology on Fixed Deployments.....	56
6	Wireless Technologies and Siting Options.....	58
6.1	Fixed Wireless.....	58
6.1.1	Technical Capacity and Limitations	58
6.1.2	Factors Impacting Quality and Speed of Service	59
6.1.3	Future Capacity and Lifespan of Investment	59
6.1.4	Millimeter Wave Technology.....	59
6.2	Mobile Wireless.....	60
6.2.1	Technical Capacity	60
6.2.2	Limitations	62
6.2.3	5G Technology	63
7	Framework for Analyzing Wireless Opportunities.....	64
8	Strategies and Recommendations.....	65
8.1	Short-term Strategies	65
8.1.1	Develop Partnerships with Wireless Carriers Seeking Access to Public Property.....	65
8.1.2	Create an “Adopt-a-Digital-Highway” Program	67
8.2	Medium-term Strategies	69
8.2.1	Develop Citywide Authentication/Federated Identity Program.....	69

8.2.2	Negotiate Wireless Digital Inclusion Products That Utilize Comcast and Other Entities' Mobile Infrastructure	74
8.3	Long-term Strategies	75
8.3.1	Develop and Expand the City's Fiber as a Platform for Low-Cost Wireless	75
8.3.2	Evaluate All Projects for Inclusion of Communications-Enabling Infrastructure	78
8.3.3	Work with Local Banks to Direct Community Reinvestment Act Support toward Broadband	83
	Appendix A: RFI	85
	Appendix B: List of RFI Recipients	86
	Appendix C: Case Studies of Municipal Wireless Projects.....	87
	New York City, New York.....	87
	Reinventing the Phone Booth.....	87
	Using Ads to Fund an Upgrade	87
	LinkNYC Kiosk's Expanding List of Services.....	89
	Free, Fiber-Powered, Wi-Fi Narrows the Digital Divide.....	90
	Kansas City, Missouri	91
	Public-Private Partnership Provides Free Wi-Fi Downtown	91
	Using Millimeter Wave Technology to Extend the Reach of Fiber	92
	ConnectHome and ConnectED	93
	San Francisco, California.....	94
	Background.....	94
	Partnering with Non-Profits	95
	The Wireless Networking Learning Curve	96
	Setting Itself up for Future Success	96
