

Ticket 5:

Customer -

In Event->Settings->Event Description, how complete is the Markdown implementation? The specifications indicate it allows in-line HTML in addition to the Markdown punctuation; are those implemented as well?

Agent -

Hi Chad,

Thanks for reaching out about markdown!

When using markdown you can edit text formatting, headers, images, links, email addresses, and links. More details and instructions can be found here: **Using Markdown**

Please let us know if you have any other questions. Our team would be happy to help!

Thanks,

Stevie Budd

Customer -

Thanks, but that “default” answer didn’t cover my question. I’ve been throughout your documentation, I’ve researched Markdown. My question is: is in-line HTML implemented, as per the Markdown specification?

Agent -

Hi Tim,

I apologize that my initial response was not helpful. I wasn't sure of your experience with markdown so I wanted to be sure I gave an overview of what we can and cannot do.

The text field supports Markdown, but not HTML. I'd be glad to pass this along as a feature request for you though!

When features are released, we normally announce them on Facebook or Twitter, but we always post new features to the **Registrations News & Updates Page**.

You can select the "Follow" option to get notified when new Registrations features are posted.

Please let us know if you have any other questions. Our team would be happy to help!

Thanks,

Stevie Budd
